## THE FINEST WINDMILL SINCE 1888

**NEW AERMOTOR WINDMILLS:** The Model #802 Aermotor Windmill continues the fine tradition of high quality workmanship that stretches all the way back to 1888. Our new windmills are once again being manufactured in the U.S.A. by the Aermotor Windmill Corporation of Texas. Many product improvements combined with American manufacturing know how make the Aermotor Model #802 windmill once again the standard of the industry.

**USED / REBUILT AERMOTOR MILLS:** We also stock used Model #702 Aermotor Windmills (subject to availability) in the 8' & 10' sizes. Our rebuilder inspects the used windmill and replaces or repairs any parts deemed unsuitable. Although we feel these used mills offer a good bargain to our customers, please remember that **USED IS NOT NEW** and that not all parts are replaced in the rebuilding process.
